

LEARNING PATH GENERATOR

Career Goal: Become a Credible Scrum Master

Stage 1: Foundations (Weeks 1–3)

- Understand the Agile Manifesto, Scrum values, and the Scrum framework (roles, events, artifacts)
- Ability to Difference between Scrum, Kanban, and other Agile frameworks
- **Milestone:** Be able to explain the Scrum framework end-to-end without notes

Stage 2: Get Certified (Weeks 4–6)

- Choose CSM (instructor-led, Scrum Alliance) or PSM (self-study, Scrum.org)
- Complete training and pass the exam
- **Milestone:** Hold a recognised Scrum Master certification

Stage 3: Get Real Reps (Weeks 7–16)

- Volunteer to facilitate ceremonies for a real team (open-source project, volunteer program like Chingu, internal transfer, side project)
- Able to practice running sprint planning, standups, retros, and reviews under real pressure
- **Milestone:** Complete one full project cycle as the facilitating Scrum Master

Stage 4: Build the Coaching Layer (Weeks 17–24)

- Shift from "running ceremonies" to coaching self-organisation
- Practice conflict facilitation and impediment removal at the organizational level, not just sprint level.
- **Milestone:** Document one case study where you coached a team through ambiguity rather than solving it for them

Stage 5: Build Proof & Visibility (Weeks 25–28)

- Ability to turn real project outcomes into metrics (velocity, cycle time, on-time delivery)
- Publish reflections (LinkedIn, portfolio) documenting real moments, not generic Scrum theory.
- **Milestone:** A portfolio with 1–2 case studies and a public post demonstrating your approach

Stage 6: Operate at Scale (Ongoing)

- Learn scaled frameworks (SAFe, LeSS) and how to adapt Scrum to regulated/hybrid environments
- Mentor a shadow Scrum Master (like you're doing now) to reinforce your own mastery
- **Milestone:** Lead a distributed or cross-functional team through a full delivery cycle
